

Bute Park Event Mode Signage - April 2017

Bute Park holds a stock of bilingual safety signage that can be deployed across the site when the park is in major 'event mode'. This is for the information of both park users and event staff and drivers etc.

Access to the signage can be agreed with the Parks Event Manager and facilitated by the Site Supervisor. It is important that you discuss the need for this signage early, as access will require advance notice.

The signage is stored in 2 cages, as shown below.

Information on the content of the signs and the locations where they should be deployed in is provided below.

The plans show the minimum number of signs which should be deployed but the tables reflect the quantity of each sign available.

Coopers Field / Castle

Event Mode Signage

4.4.17

		Number of signs
1	Stop and wait	2
2	Caution pedestrians and cyclists crossing	6
